

Meridian 1 Option 11C Mini

Bring the
full power
of your Meridian 1 to your
small branch office.

NORTEL
NETWORKS™

How the world shares ideas.

Your small branch offices can now get all the power, capabilities, and features of your Meridian 1* in a new PBX system, the Meridian 1 Option 11C Mini.

further flexibility. Mini has the same Internet capability as the larger Meridian 1 PBXs, so your branch office can take advantage of current and future Meridian IP applications and products.

Best of all, the Option 11C Mini can be installed almost anywhere with ease. It can be rack, wall, table, or shelf mounted in minutes. And while the Mini can grow to an impressive 700 lines, if your office should outgrow it and you upgrade to a

Meridian Integrated Conference Bridge (MICB) and Meridian Integrated Recorded Announcements (MIRAN). With the MICB, employees can set up teleconferences of up to 62 participants; and with MIRAN, any size office can offer callers sophisticated recorded product and other announcements 24 hours a day.

Since the Mini uses the same desktop features and administration as larger Meridian systems, it can be fully

The Meridian 1

A small branch office networking solution that's

Option 11C Mini

Specially designed for small branch offices and remote sites, this small powerhouse of a PBX can function as a standalone unit or as an end node in a Meridian 1 network. When networked with your larger Meridian 1 switch, such as an Option 51, 61C, or 81C, the Option 11C Mini accesses the main Meridian 1's centralized services like Meridian Mail and Symposium* to deliver everything your branch office needs to do business.

The Mini is perfect for the 20- to 80-line branch office. It supports the same lines, trunks, and software applications as its larger sibling, the proven Meridian 1 Option 11C, plus, it supports the full portfolio of Meridian desktop telephones. Yet this pint-sized PBX costs less and does more than anything in its class on the market today.

The Option 11C Mini can be networked over your Nortel Networks system with a traditional T1 link, and it supports fiber remotes to provide even

larger Meridian 1 system, you can easily re-use the Mini capabilities for added capacity within your enterprise. The choice is yours.

All the capabilities of Meridian 1 in a very small package.

Big things really do come in small packages! Imagine getting all the features of your Meridian 1 switch from a unit about the size of your office fax machine.

Here's how: The Option 11C Mini supports all Meridian 1 networking protocols, letting you take advantage of the full range of integrated Meridian 1 applications, including Meridian Mail, Symposium Call Center, Symposium IVR and Directory Service, Symposium desktop applications, and Meridian mobility solutions, plus a host of IP applications.

With the Mini, your small branch office will be able to offer callers such sophisticated business applications as the

integrated into your Meridian 1 voice mail and easily administered from your central location. Mini also supports Meridian Administration Tools and Meridian Configurator.

And not only is the Option 11C Mini competitively priced, it's also easy to install. You can put it just about anywhere: on the wall (horizontally or vertically), a table, a shelf, or a standard 19-inch rack mount. The rack mount lets you place the Mini in the same racks used for Passport, Symposium, or other data products that would reside in a 19-inch rack mount unit. When it comes to delivering the goods, the Option 11C Mini is a king-sized idea in a smart, little package.

Mini Cost, Maxi Power.

If your branch office needs fewer than 80 lines, you'll find that the Option 11C Mini gives you impressive power at a cost that's significantly less than the larger Option 11C. Then compare it to the

competition: You'll find that the Mini offers unsurpassed features, power, and value for its class.

When your branch office branches out, the Mini grows with you.

As your business grows, your branch offices will, too. So it's comforting to know that while the Option 11C Mini is specially designed for the 20-

The Mini System Controller (MSC) card has proven technology from the Option 11C Small System Controller (SSC); it has X11 software pre-programmed directly onto the MSC, and it supports up to 10 logical slots—the equivalent of two chassis. If you want to expand beyond two chassis, just replace the MSC with an SSC and connect the multiple chassis with fiber.

The Option 11C Mini's creative

business, they'll get the same professional response, reliable communications, and polished corporate image, regardless of their call's final destination. The bottom line? Your business communications are consistent and indiscernible from one location to another, and your employees look and feel more effective—because they are.

As a Meridian 1 Internet Enabled system, the Option 11C Mini gives your small branch office and remote employees

easy on the budget—and powerful on capabilities.

80-line range, it has the flexibility to grow to 700 lines.

To fully appreciate the sheer muscle of this small-scale PBX, take a close look at the design. The Mini is packaged in a main chassis that houses its own power supply, plus the Mini System Controller (MSC), a 48-Port digital line card, and slots for three additional IPE packs. It can accommodate up to three PRI packs. This is an elegantly economical solution for small sites needing up to 80 lines.

Unique to the Mini, the 48-port digital line card supports 48 voice ports and 48 data ports. With the availability of the 48 digital ports, you can take full advantage of voice and data capability from your Meridian 1 telsets using the Meridian Communications Adapter and/or the Analog Terminal Adapter. The Mini also supports all Meridian telephone sets, including the M2000 series phones, the M3900 series phones, and the M2250 Attendant Console.

chassis design lets you grow your system in four-slot increments. Its main chassis offers four slots linked by two copper cables to a Chassis Expander, which provides an additional four slots. Want to expand even further? No problem. You can add up to four main chassis and four Chassis Expanders for a total capacity of up to 700 lines. And should you need to expand to a larger Meridian 1, your chassis becomes part of your larger system. It's all part of Nortel Networks' "Evergreen" strategy, our commitment to offer a clear upgrade path that lets you grow your Option 11C Mini system along with your business.

Get Totally Wired. It's Good for Business.

With the Mini, it makes no difference whether your employees work in your central office, a satellite location, or whether they're home-based. They'll all have access to the same seamless applications and features. When customers call your

the full range of Meridian IP applications and products, including the Meridian IP Telecommuter, the Meridian Integrated Telephony Gateway, Remote Office, and Home Office II.

With these applications, remote workers can get integrated voice and data, LAN-speed data access, plus fax and voice mail at the office or when working from home. All the bells, all the whistles.

Future-Proof Your Branch Office

With the Option 11C Mini, your branch office can handle the future with confidence. That's because the Mini was engineered from proven Option 11C technology and takes advantage of the same software enhancements that become available with the Option 11C.

In fact, the Option 11C Mini uses the same Meridian 1 X11 software packages as the Option 11C, General Business, Enhanced Business, Enterprise Business, and Network Attendant Services/Virtual

Network Services. The Mini comes with 100 initial terminal lines and can be grown in increments of 100. Software upgrades and system expansions for the Mini are available in minutes via keycode from the Option 11C Internet software download site. This site lets you change or include software option packages, ISM parameter upgrade packages, and feature set upgrade packages.

And with the Mini's Internet Enabled options, you can use the Meridian Internet Telephony Gateway for IP trunks and lines, allowing you to easily migrate your existing telephony network toward the unified voice and data network of the future.

What the Mini gives you that the competition doesn't.

Go ahead. Compare the Option 11C Mini to any other product in its class on the market. You'll quickly see it's the leading solution for your under 80-line size branch office. Look closely, compare carefully, and you'll find that the Mini gives you the following critical capabilities that the competition often lacks.

- **A Clear Migration Path** — While the Mini can grow to 700 lines, its migration capabilities don't stop there. Designed along with the Option 11C, the Mini protects your investment with an economical and technologically graceful migration path. And if you do outgrow your Mini, it's re-usable in another office. And because of its small size and variety of options for installing, it's also easy on your budget to move it from one location to another.
- **Fiber Remote** — The Option 11C Mini offers fiber remote capabilities.
- **Scalability to 700 Lines** — From 20 to 700 users. Now that's scalability. While the Mini is especially designed for the 20- to 80-line range, it can grow as fast as you do.
- **Centralized Voice Mail** — It's important for every part of your company to speak with the same voice. With centralized voice mail, you can offer your customers the same premier quality voice mail— no matter what office they call.

Local or Global, We're Here For You

Whether you have a single branch office or hundreds of branches around the world, the Option 11C Mini will put all the power, flexibility, and value of your Meridian 1 network to work for you. The Mini is available in 180 countries around the world.

For more information about the genius of networking with the Meridian 1 Option 11C Mini, contact your authorized Nortel Networks Meridian 1 distributor or call 1-800-4NORTEL. And visit our website at www.nortelnetworks.com.
